ABOUT ME

She/her

I am a career-transitioning Tech Associate who completed the She Codes Plus industry bootcamp in December 2025, developing practical full-stack capability across React, Django and modern deployment environments.

With over a decade of experience working in structured and compliance-driven workplaces in the disability and mining sectors, I bring analytical thinking, strong accountability and a risk-aware mindset to engineering teams. I am motivated by building secure, scalable systems that are accessible, protect user data, operate reliably under pressure and improve access at scale.

SOFTWARE & TECHNICAL

- HTML/CSS
- Python
- MicroPython
- Django/DRF
- JavaScript/React

SKILLS

Software Engineering:

- Build full-stack web applications using HTML, CSS, React and JavaScript.
- Develop back-end systems with Django and Django REST Framework, including relational database modelling (SQLite), RESTful API design, authentication flows and structured Git-based workflows.

Hardware & Embedded Systems:

- Develop MicroPython applications using Raspberry Pi and programmable hardware.
- Integrate distance sensors, LED light strips and 8x32 pixel matrix displays with event-driven logic and power management considerations.

Development Environment & Tooling:

- Use Visual Studio Code for application builds and manage version control through GitHub.
- Test APIs with Insomnia.
- Configure front-end builds using Vite.
- Deploy applications via Netlify and Heroku.

Collaboration & Delivery:

- Work collaboratively in team-based development environments.
- Manage sprint tasks via Trello and facilitate retrospectives using tools such as Save Point.

TECHNICAL PROJECTS

Plottwist You are the Author – Community Literature Application

She Codes Plus Personal Full Stack Project: An interactive storytelling platform enabling users to collaboratively build and contribute to evolving short stories and poems.

Key Achievements

- **Role**: Designer, Author and Full Stack Developer
- **Tasks/Techniques**: Object-oriented programming, authentication and access control, API design and testing with Insomnia, Cloudinary integration for media storage.
- **Tech Stack:** React, JavaScript, Django, DRF, SQLite, Heroku, Netlify, VSCode, GitBash.

Save Point – Live Interactive Retrospective Application

She Codes Plus Full Stack Group Project: A live retrospective application designed to capture and organise team insights through structured, interactive engagement.

Key Achievements

- **Role:** Project Manager and Product Testing
- **Tasks/Techniques:** Client collaboration including measurable goal setting, actionable and specific feedback and expectation management. Trello usage for project management, team collaboration, and workflow automation. Testing for usability, security functionality and performance. Planning of UX/UI and user flows. Preparation of final live presentation
- **Tech Stack:** Django 5.1, DRF, (WebSockets) React 19, Vite, SQLite, PostgresSQL, WebSockets via Django Channels, Redis, Heroku with Gunicorn + Whitenoise.

Project Sparkle – Hardware-Integrated Interactive Dress

Passion Project: Co-lead the development of a hardware-integrated interactive dress designed to fulfil a vision for the founder of She Codes. Deliver under fixed launch deadlines with cross-functional collaboration across technical and creative contributors.

Key Achievements

- **Role:** Lead coordination across a small technical team of she codes 2025 students, mentors and external collaborators (MadeApt).
- **Task/Techniques:** Stakeholder, client and production team collaboration. Problem solving integration of hardware, software and garment design. Diagnosing issues including critical glitch before launch at She Codes Plus showcase.
- **Tech Stack:** Raspberry Pi 4, MicroPython, 8 x 32 Pixel Matrix, 2 x 5m LED Light Strips, Distance Sensor, Variety of wires, connectors, clips, tapes and fasteners.

TAMALA HEALY

0421276744 |tamala556@gmail.com| LinkedIn Profile | GitHub |Portfolio & Live Projects

- Follow structured Git workflows and liaise with stakeholders to translate requirements into technical deliverables.

Secure Development Awareness:

- Handle structured data, implement validation logic and work within regulated environments.
- Maintain awareness of privacy, accuracy and risk management considerations.

Leadership Under Pressure:

- Coordinate cross-functional teams to deliver technical solutions against fixed deadlines.
- Present and demonstrate in live environments requiring rapid debugging and system recovery.

Analytical Thinking:

- Apply a strong statistical and logical reasoning foundation developed through Psychology studies and accounting training.
- Use structured problem-solving and system design approaches.

Continuous Learning:

- Proactively extend technical capability through independent projects, React Native experimentation and ongoing GitHub development beyond formal training.

EDUCATION

SHE CODES PLUS |She Codes Australia
05/2025 – 12/2025

BACHELOR OF ARTS – PSYCHOLOGY | UWA
2016 – 2021

ADVANCED DIPLOMA - ACCOUNTING | GSIT
2008/2009

VOLUNTEER

SHE CODES AUSTRALIA – Mentor
Mentoring at my first She Codes Australia Workshop in March 2026

FREMANTLE VOLLEYBALL CLUB INC – Treasurer
Responsible for managing financial operations and compliance providing sweet treats for committee meetings.

PROFESSIONAL EXPERIENCE

PROCESS MINERALS INTERNATIONAL | Village Allrounder
2023 – 2025 | WA
Supported operational systems within a large-scale mining environment, maintaining structured documentation and accurate inventory data.

Key Achievements

- Redesigned stock tracking system, improving budgeting accuracy
- Identified and corrected data inconsistencies, strengthening reporting reliability
- Operated within strict safety and compliance frameworks

HUMDRUM | Support Coordinator & Housing Officer
2021 – 2023 | WA
Managed complex caseloads within NDIS regulatory frameworks, handling sensitive client data and producing structured documentation. Introduces housing program to enable participants to live independently in their own homes.

Key Achievements

- Produced detailed reports used in formal review processes
- Maintained strict confidentiality and regulatory compliance
- Coordinated multidisciplinary stakeholders across metro, regional and remote environments

Support Coordinator – Business Owner
2020 – 2021 | WA
Established and managed a disability service-based business operating within structured funding and compliance systems.

Key Achievements

- Developed governance and documentation processes
- Managed financial tracking and plan sustainability
- Recruited and supervised support staff and teams
